

Eu151 Klaus magnetostir -- Barnett precursor (orbital response without spin relaxation)
p=26700 (Bz=1G), full Eu MF,phis: 1, 2, 3, 4.524, 6, 8, 12, 18 -- spin frozen by construction, awaiting K3+gamma_dr to drain into F

(a) orbital angular momentum (Berry connection)

(b) spin sector frozen (no loss channel)

(c) orbital response scaling
